The copernican revolution was the paradigm shift from the ptolemaic model of the heavens which described the cosmos as having earth stationary at the center of the universe to the heliocentric model with the sun at the center of the solar system this revolution consisted of two phases the first being extremely mathematical in nature and the second phase starting in 1610 with the publication.

**In 1543 the polish astronomer nicolaus copernicus lay on his deathbed reportedly holding his just published masterpiece the revolutions of the heavenly spheres in his hands placing the sun at the center of the universe copernicus launched modern science leading to a pletely new understanding of the universe and humanity s place within it**

Novelist and journalist william t vollmann in his incredibly unlikely uncentering the earth copernicus and the revolutions of the heavenly spheres wrote that what moves me the most about copernicus was his struggle to free the human mind from a false system. Modern readers are less inclined than earlier ones to sit through copernicus s juggling of ptolemy s epicycles to discover how he arrived at his eureka moment that the earth moves around the sun.
