"Críticas ""Designs for the Pluriverse is a heavy-hitting theoretical framework with potential to inform the practice of the design scholar or professional in any field, from planning or architecture to product design, engineering, and beyond. The work makes sense of generations of decolonial scholarship, pushing the reader towards understanding their design work as more relational, long-term-oriented, and transformative than previously assumed."" -- Darien Williams * Carolina Planning Journal * ""Escobar's literature review and theoretical discussion stand out. Some of the ground he covers includes critical design studies, ethnographic approaches to design, participatory design, and decolonized design. Anthropology has a lot to offer design, Escobar argues, because we study the interplay of materiality, meaning, and practice. . . . Escobar's discussion is built on a foundation of work emanating from a panoply of Latin American scholars, all of whom appear to be fascinating in their own rights. . . . Through Escobar I felt like I was glimpsing the depth and breadth of that body of literature for the first time."" -- Matt Thompson * Anthrodendum * Reseña del editor In *Designs for the Pluriverse* Arturo Escobar presents a new vision of design theory and practice aimed at channeling design's world-making capacity toward ways of being and doing that are deeply attuned to justice and the Earth. Noting that most design—•from consumer goods and digital technologies to built environments—•currently serves capitalist ends, Escobar argues for the development of an ""autonomous design"" that eschews commercial and modernizing aims in favor of more collaborative and place-based approaches. Such design attends to questions of environment, experience, and politics while focusing on the production of human experience based on the radical interdependence of all beings. Mapping autonomous design's principles to the history of decolonial efforts of indigenous and Afro-descended people in Latin America, Escobar shows how refiguring current design practices could lead to the creation of more just and sustainable social orders. Biografía del autor Arturo Escobar is Kenan Distinguished Professor of Anthropology at the University of North Carolina, Chapel Hill."
